

Mathematical Process Standards

5.1 Mathematical process standards. The student uses mathematical processes to acquire and demonstrate mathematical understanding.

Tools to Know

- 5.1(A) apply mathematics to problems arising in everyday life, society, and the workplace
 5.1(B) use a problem-solving model that incorporates analyzing given information, formulating a plan or strategy, determining a solution, justifying the solution, and evaluating the problem-solving process and the reasonableness of the solution
 5.1(C) select tools, including real objects, manipulatives, paper and pencil, and technology as appropriate, and techniques, including mental math, estimation, and number sense as appropriate, to solve problems

Whole Number Operations

5.3 Number and operations. The student applies mathematical process standards to develop and use strategies and methods for positive rational number computations in order to solve problems with efficiency and accuracy.

5.4 Algebraic reasoning. The student applies mathematical process standards to develop concepts of expressions and equations.

STAAR	Readiness Standards	Supporting Standards
2-5 items	5.3(K) add and subtract positive rational numbers fluently 5.4(B) represent and solve multi-step problems involving the four operations with whole numbers using equations with a letter standing for the unknown quantity 5.4(F) simplify numerical expressions that do not involve exponents, including up to two levels of grouping	5.3(A) estimate to determine solutions to mathematical and real-world problems involving addition, subtraction, multiplication, or division 5.3(B) multiply with fluency a three-digit number by a two-digit number using the standard algorithm 5.3(C) solve with proficiency for quotients of up to a four-digit dividend by a two-digit divisor using strategies and the standard algorithm 5.4(E) describe the meaning of parentheses and brackets in a numeric expression

Decimals

5.2 Number and operations. The student applies mathematical process standards to represent, compare, and order positive rational numbers and understand relationships as related to place value.

5.3 Number and operations. The student applies mathematical process standards to develop and use strategies and methods for positive rational number computations in order to solve problems with efficiency and accuracy.

5.4 Algebraic reasoning. The student applies mathematical process standards to develop concepts of expressions and equations.

12-13 items	5.2(B) compare and order two decimals to thousandths and represent comparisons using the symbols $>$, $<$, or $=$ 5.3(E) solve for products of decimals to the hundredths, including situations involving money, using strategies based on place-value understandings, properties of operations, and the relationship to the multiplication of whole numbers 5.3(G) solve for quotients of decimals to the hundredths, up to four-digit dividends and two-digit whole number divisors, using strategies and algorithms, including the standard algorithm 5.3(K) add and subtract positive rational numbers fluently 5.4(F) simplify numerical expressions that do not involve exponents, including up to two levels of grouping	5.2(A) represent the value of the digit in decimals through the thousandths using expanded notation and numerals 5.2(C) round decimals to tenths or hundredths 5.3(A) estimate to determine solutions to mathematical and real-world problems involving addition, subtraction, multiplication, or division 5.3(D) represent multiplication of decimals with products to the hundredths using objects and pictorial models, including area models 5.3(F) represent quotients of decimals to the hundredths, up to four-digit dividends and two-digit whole number divisors, using objects and pictorial models, including area models 5.4(E) describe the meaning of parentheses and brackets in a numeric expression

Fractions		Connected Knowledge and Skills 5.4
5.3 Number and operations. The student applies mathematical process standards to develop and use strategies and methods for positive rational number computations in order to solve problems with efficiency and accuracy.		
STAAR	Readiness Standards	Supporting Standards
3-5 items	5.3(K) add and subtract positive rational numbers fluently 5.3(L) divide whole numbers by unit fractions and unit fractions by whole numbers	5.3(A) estimate to determine solutions to mathematical and real-world problems involving addition, subtraction, multiplication, or division 5.3(H) represent and solve addition and subtraction of fractions with unequal denominators referring to the same whole using objects and pictorial models and properties of operations 5.3(I) represent and solve multiplication of a whole number and a fraction that refers to the same whole using objects and pictorial models, including area models 5.3(J) represent division of a unit fraction by a whole number and the division of a whole number by a unit fraction such as $1/3 \div 7$ and $7 \div 1/3$ using objects and pictorial models, including area models 5.4(A) identify prime and composite numbers

Graphing on Coordinate Plane		
5.4 Algebraic reasoning. The student applies mathematical process standards to develop concepts of expressions and equations. 5.8 Geometry and measurement. The student applies mathematical process standards to identify locations on a coordinate plane.		
5-6 items	5.4(C) generate a numerical pattern when given a rule in the form $y = ax$ or $y = x + a$ and graph 5.8(C) graph in the first quadrant of the coordinate plane ordered pairs of numbers arising from mathematical and real-world problems, including those generated by number patterns or found in an input-output table	5.4(D) recognize the difference between additive and multiplicative numerical patterns given in a table or graph 5.8(A) describe the key attributes of the coordinate plane, including perpendicular number lines (axes) where the intersection (origin) of the two lines coincides with zero on each number line and the given point (0, 0); the x-coordinate, the first number in an ordered pair, indicates movement parallel to the x-axis starting at the origin; and the y-coordinate, the second number, indicates movement parallel to the y-axis starting at the origin 5.8(B) describe the process for graphing ordered pairs of numbers in the first quadrant of the coordinate plane

Geometry and Measurement		Connected Knowledge and Skills 5.4
5.5 Geometry and measurement. The student applies mathematical process standards to classify two-dimensional figures by attributes and properties. 5.6 Geometry and measurement. The student applies mathematical process standards to understand, recognize, and quantify volume. 5.7 Geometry and measurement. The student applies mathematical process standards to select appropriate units, strategies, and tools to solve problems involving measurement.		
5-7 items	5.4(H) represent and solve problems related to perimeter and/or area and related to volume 5.5(A) classify two-dimensional figures in a hierarchy of sets and subsets using graphic organizers based on their attributes and properties	5.6(A) recognize a cube with side length of one unit as a unit cube having one cubic unit of volume and the volume of a three-dimensional figure as the number of unit cubes (n cubic units) needed to fill it with no gaps or overlaps if possible 5.6(B) determine the volume of a rectangular prism with whole number side lengths in problems related to the number of layers times the number of unit cubes in the area of the base 5.7(A) solve problems by calculating conversions within a measurement system, customary or metric
SEs Not Included in Assessed Curriculum		5.4(G) use concrete objects and pictorial models to develop the formulas for the volume of a rectangular prism, including the special form for a cube ($V = l \times w \times h$, $V = s \times s \times s$, and $V = Bh$)

Data Analysis		
5.9 Data analysis. The student applies mathematical process standards to solve problems by collecting, organizing, displaying, and interpreting data.		
STAAR	Readiness Standards	Supporting Standards
2-3 items	5.9(C) solve one- and two-step problems using data from a frequency table, dot plot, bar graph, stem-and-leaf plot, or scatterplot	5.9(A) represent categorical data with bar graphs or frequency tables and numerical data, including data sets of measurements in fractions or decimals, with dot plots or stem-and-leaf plots 5.9(B) represent discrete paired data on a scatterplot

Personal Financial Literacy		
5.10 Personal financial literacy. The student applies mathematical process standards to manage one's financial resources effectively for lifetime financial security.		
1-2 items		5.10(A) define income tax, payroll tax, sales tax, and property tax 5.10(B) explain the difference between gross income and net income 5.10(E) describe actions that might be taken to balance a budget when expenses exceed income 5.10(F) balance a simple budget
	<i>SEs Not Included in Assessed Curriculum</i>	5.10(C) identify the advantages and disadvantages of different methods of payment, including check, credit card, debit card, and electronic payments 5.10(D) develop a system for keeping and using financial records

34 items	21-23 questions from Readiness Standards	11-13 questions from Supporting Standards
----------	--	---

Mathematical Process Standards	
5.1 Mathematical process standards. The student uses mathematical processes to acquire and demonstrate mathematical understanding.	
Ways to Show	
5.1(D)	communicate mathematical ideas, reasoning, and their implications using multiple representations, including symbols, diagrams, graphs, and language as appropriate
5.1(E)	create and use representations to organize, record, and communicate mathematical ideas
5.1(F)	analyze mathematical relationships to connect and communicate mathematical ideas
5.1(G)	display, explain, and justify mathematical ideas and arguments using precise mathematical language in written or oral communication

NOTE: The classification of standards on this Snapshot represents the reviewed and synthesized input of a sample of Texas Math teachers. This Snapshot DOES NOT represent a publication of the Texas Education Agency. District curriculum may reflect other classifications.
